

Jordy Alexander Barus

jordyalexanderbarus@gmail.com | +6285260778001

I am an Informatics Engineering student at Universitas Advent Indonesia with skills in web development, mobile application development, and network management. I am experienced in HTML, CSS, JavaScript, Laravel, MySQL, Java, and Kotlin, and continue developing my skills to grow in the IT industry.

AREA OF EXPERTISE

Web Development	Network Management	Time Management
Mobile Development	Database Management	Critical Thinking

EXPERIENCE

Website Development Intern, **Jun 2025 - Aug 2025**
Seventh-day Adventist Church West Indonesia Union Mission

- Assisted in developing and maintaining the organization's website, including website design, content management, and improving functionality to support organizational information systems and digital services.

Installation Engineer Assistant, **Jan 2026 - Feb 2026**
PT. Berca Hardayaperkasa

- Assisted engineers in network installation and configuration processes, including device setup, cable management, troubleshooting, and ensuring network systems operated properly during implementation projects.

EDUCATION

Universitas Advent Indonesia **Aug 2022 - Present**
Final Year

- Undergraduate Student of Informatics Engineering
- GPA : 3.35/4.00
- Coursework : Web Development and Network Management

ORGANIZATION

Student Association for Disaster Management **Aug 2023 - Aug 2024**
Logistics Staff

Responsible for managing logistics, organizing equipment, and supporting operational activities during events and organizational programs.

Student Executive Board Universitas Advent Indonesia **Aug 2023 - May 2024**
Minister of Foreign Affairs

Assisted in leading organizational activities, coordinating members, and ensuring effective teamwork and discipline within the organization.

Student Association for Disaster Management **Aug 2024 - May 2026**
Vice Commander

Assisted in leading organizational activities, coordinating members, and ensuring effective teamwork and discipline within the organization.

PROJECTS

Web Development - NexaStore (Game TopUp Website)

Developed a web-based game top-up platform using HTML, CSS, and JavaScript. Focused on responsive design, user-friendly interface, and secure transaction flow for users.

Database System - Student Data Management App

Collaborated with a team to design and develop a Java-based CRUD application integrated with MySQL. The app allows adding, editing, and searching student data. Focused on building a well-structured relational schema and implementing core database operations with a clean interface.

Front-End Development - Rinso (Website Clone Project)

Cloned several website interfaces to improve front-end structure and design practices. Developed the projects using HTML, CSS, Bootstrap, and Tailwind CSS, focusing on responsive layouts, UI consistency, and modern styling techniques. These projects improved my understanding of web structure, component styling, and responsive web design.

Full Stack Web Development - FlickTicketPro (Movie Ticket App)

Built a full-stack movie ticket booking application using Laravel, Tailwind CSS, and JavaScript. Developed features such as movie listings, schedule selection, and ticket booking. Focused on responsive UI, clean code structure, and RESTful API integration to improve user experience and full-stack development skills.

Mobile Programming - Calcify (Calculator App)

Developed a calculator application to improve understanding of mobile application structure and user interaction. Built the application using Java and Kotlin, focusing on arithmetic operations, responsive button interactions, and clean user interface design. This project improved my understanding of Android application logic and mobile UI development.

Mobile Programming - SecureAuth (Registration App)

Created a user registration application to learn user input handling and validation processes in mobile development. Developed the application using Java and Kotlin, focusing on form validation, secure password handling, and database integration. This project improved my understanding of authentication flow and data management in Android applications.

Mobile Programming - NoteSphere (Notes App)

Built a note-taking application to practice data management and user-friendly mobile interface design. Developed the application using Java and Kotlin, focusing on creating, editing, saving, and deleting notes efficiently. This project improved my understanding of mobile data storage and application functionality design.

CERTIFICATION

- Alibaba Cloud Certified Associate Cloud Engineer (**Alibaba Cloud**)
